

depend on stops, that the interpreters might insert
wrongly. - I never thought about this - but if I
had I should hardly have thought a sensible trans-
criber would have made me describe the solar light
as "long"! - would it be worth while, please
tell me at leisure, to send an account of obs. to
Astr. Register - with just an allusion to their hav-
ing been in part incorrectly published at the
time? - I could, in that, give some compara-
tive estimates of light of D & H, which was
in Times useful; from condensation & ill-work-
ing-out - a new word Germanice! -

We are fully building on your coming wa very
pleasant visit - when we shall have I hope many
a pleasant talk - & if my science can be rubbed
up - now rapidly oxidising - (but what wonder
when there is oxyg. in O) you see the man to
do it.

By the way, Murray says confidently

a triple Iris is visible in the fall of a river,
near Meyringew. Due vent-il? I saw the
double the other day at the Devil's Bridge &
I dare say it might be picked out in many
other places - but triple ??? - I saw the
summit of a rainbow under the level of the
eye at the Furka - pretty, & singular, & I
just sketched it.

Do you care for doctrine of Chances? It was
a funny one that placed us in 3 consecutive
levels abroad in N^o. 1 2 3. - the 3^d time
it certainly made me stare!

If you should by any possibility meet with
anyone who would lend me the concluding part
of Rushworth (1648 to end inclusive) I would
take my care of it. I c^d. not quite finish it
in Museo Britan. yesterday and my dreaded ene-
my the Sixth battalion of the Clock routed
me. I give's kindest love with mine ever,
your affct. friend J. W. Webb
